## NEW RELEASES

### **Natural Standard Medical Conditions Reference: An Integrative Approach**

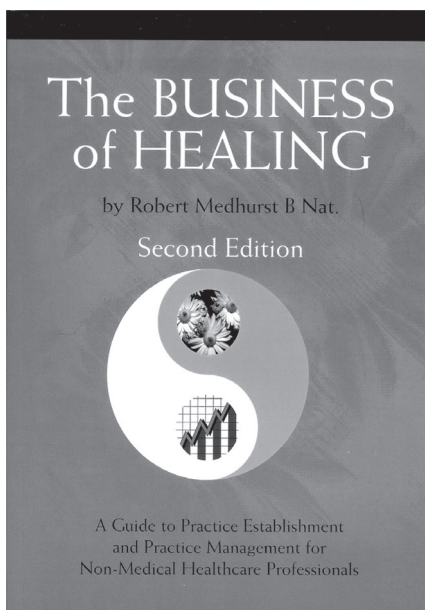

*Catherine Ulbricht PharmD*

Healthcare providers are often approached by patients about complementary therapies, whether self-prescribing or wanting to add therapies as an adjunct to the medical treatment they will be receiving. In addition, many healthcare providers plan to incorporate complementary treatments into their practice for a more integrative approach. Whichever the case, it is important for the healthcare provider to have access to information about complementary and integrative treatments and the way they work with standard medical therapies. Answering this need is Natural Standard Medical Conditions Reference: An Integrative Approach, a quick reference book with integrative medicine monographs for more than 100 of the most crucial conditions. This is your best source for comprehensive, evidence-based integrative medicine information, categorized according to evidence and proven efficacy. Conventional medical treatment is thoroughly explained, as well as lifestyle changes that could benefit the patient. The leading author is a PharmD from The Natural Standard Research Collaboration, which is well respected in both medical and natural medicine communities.

### **The Business of Healing**

2nd Edition – 9 new chapters

*Robert Medhurst B Nat*

Now in its second edition, this book has been written by a naturopath who has operated several successful clinical practices, has tertiary qualifications in management and has lectured on this subject around Australia since 1996. The first edition of The Business of Healing became widely regarded as the best book of its type in Australia and has become the set text for this subject in most institutions teaching non-medical health care since 2003. The book covers the requirements for setting up, operating and marketing a successful non-medical healthcare practice. It provides information on everything from selecting your clinic location and getting started in business, through to exit and succession planning, from the author's own personal experience and that of some of Australia's most successful practitioners. This book is essential reading for anyone contemplating setting up a non-medical healthcare practice, or those who have a desire to increase the impact of their existing practice.

**ISBN 978 0 958079 81 5    263 pages    Robert Medhurst**
